

Bay Area Health Trust continues to support innovation, life sciences, and healthcare in Ontario with its new state of the art facility

(HAMILTON, ON) – Bay Area Health Trust (BAHT) will be opening the doors of their new state of the art facility in Hamilton.

For the last twenty years, BAHT has pushed the envelope to play a critical role in the Hamilton life sciences community, establishing its presence at the intersection of healthcare and innovation. Through its operating units, BAHT provides critical products and services ranging from clinical trial infrastructure to the commercialization of local innovations.

Once operational, the facility will enable BAHT to accelerate execution of its growth strategy, create jobs, and provide both current and future clients state-of-the-art equipment, clean rooms, and inventory management systems.

“We have invested over \$2 million in this project, because we see the demand and want to ensure we continue providing 110 per cent for the people of Hamilton, Ontario, and Canada,” said Peter Kalra, President and CEO, BAHT. “Attracting international business interest and keeping Canadian innovations domestic is only possible when you have the right opportunities.”

Continued funding in the Canadian innovation and healthcare space is a step in the right direction and will see organizations like BAHT continue to grow both domestically and on the international stage.

About Bay Area Health Trust

At the intersection of health, life sciences and business, Bay Area Health Trust is an example of a successful partnership between hospitals and the for-profit private sector. Operating life science businesses with the goal of returning value to its beneficiaries, Hamilton Health Sciences, Hamilton Health Sciences Foundation and McMaster University, Bay Area Health Trust promotes entrepreneurship and invests in growth-oriented businesses to support patient care.
